

Optomechanics - Fibers

Our Multimode Fibers are durable and high-quality patch cords that consistently deliver uniform results with the minimal signal or energy variance. These products offer a wide range of fiber-optic cables, which can be made in a variety of lengths and configurations to meet users' needs. It is recommendable to use our fibers in the operation condition under 15 watts of optical power.

/ Features

- Resistant up to 15 watts of optical power
- Superior quality and handling for demanding applications
- Ideal for research, industrial use, or other applications

Durable and High-quality patch cords
